Author Index

Barrie, L.A. 1
Batley, G.E. 301
Bidleman, T. 1
Brockbank, C.I. 301
Bukowski, J.A. 291

Dudka, S. 279

Edmonds, J.S. 321

Francesconi, K.A. 321
Frontasyeva, M.V. 337

Gates, D. 291
Goldstein, M.D. 291
Gorbunov, A.V. 337
Gregor, D. 1
Gundorina, S.F. 337

Hargrave, B. 1,75

Jaga, K. 315

Kinloch, D. 247
Korn, L.R. 291
Kuhnlein, H. 247

Lake, R. 1
Lockhart, W.L. 165

Maksjuta, B.B. 337
Markert, B. 279
Marshall, H. 135
McLinden, M. 291
Morita, M. 321
Muir, D. 1
Muir, D.C.G. 75,247

Norstrom, R.J. 75,135

Onischenko, T.L. 337

Pal, C.S. 337
Peakall, D.B. 75

Rama, D.B.K. 315
Rudakewych, M. 291

Scammell, M.S. 301
Shearer, R. 1
Shepperly, D. 291
Shibata, Y. 321
Sutherland, D. 165

Thomas, D.J. 75,135,165
Tracey, B. 1,135,165

Wagemann, R. 75,165

Yoshinaga, J. 321

Subject Index

Acids, arctic environment, toxic substances, metals, radionuclides, organochlorines, polycyclic aromatic hydrocarbons, 1
Antifouling paints, tributyltin, oysters, copper, zinc, 301
Arctic, terrestrial ecosystem, contaimination pathways, radioactive fallout, organochlorines, polychlorinated biphenyls, terrestrial food chain, local contamination sources, 135
Arctic environment, toxic substances, metals, radionuclides, acids, organochlorines, polycyclic aromatic hydrocarbons, 1
Arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Arsenic lipids, rock lobster digestive gland, arsenobetaine, HPLC ICP-MS, 321
Arsenobetaine, rock lobster digestive gland, arsenic lipids, HPLC ICP-MS, 321

Baseline concentrations, surface soils, Poland, multielement analysis, contamination, variance analysis, 279
Biological implications, Canadian arctic, chemical contaminants, freshwaters, hydrocarbons, organochlorines, metals, radionuclides, 165
Biological monitoring, pesticide exposure, cholinesterase, 315
Biomonitoring, chromium, exposure assessment, environmental exposure, 291

Cadmium hydrocarbons, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, polychlorinated dioxins, polychlorinated furans, 75
Canadian arctic, chemical contaminants, freshwaters, hydrocarbons, organochlorines, metals, radionuclides, biological implications, 165
Chemical contaminants, Canadian arctic, freshwaters, hydrocarbons, organochlorines, metals, radionuclides, biological implications, 165
Cholinesterase, pesticide exposure, biological monitoring, 315
Chromium, biomonitoring, exposure assessment, environmental exposure, 291
Contaimination pathways, arctic, terrestrial ecosystem, radioactive fallout, organochlorines, polychlorinated biphenyls, terrestrial food chain, local contamination sources, 135
Contaminants, diet, Inuit, foods, nutrition, 247
Contamination, baseline concentrations, surface soils, Poland, multielement analysis, variance analysis, 279
Copper, tributyltin, oysters, antifouling paints, zinc, 301

Diet, contaminants, Inuit, foods, nutrition, 247

Element pollutants in soils and vegetation, neutron activation analysis, phosphorus fertilizer, rare-earth elements, X-ray fluorescence analysis, 337
Environmental exposure, chromium, biomonitoring, exposure assessment, 291
Exposure assessment, chromium, biomonitoring, environmental exposure, 291

Foods, contaminants, diet, Inuit, nutrition, 247

Freshwaters, Canadian arctic, chemical contaminants, hydrocarbons, organochlorines, metals, radionuclides, biological implications, 165

Heavy metals, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
HPLC ICP-MS, rock lobster digestive gland, arsenic lipids, arsenobetaine, 321
Hydrocarbons, Canadian arctic, chemical contaminants, freshwaters, organochlorines, metals, radionuclides, biological implications, 165

Inuit, contaminants, diet, foods, nutrition, 247

Lead, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Local contamination sources, arctic, terrestrial ecosystem, contaimination pathways, radioactive fallout, organochlorines, polychlorinated biphenyls, terrestrial food chain, 135

Marine fish, arctic marine ecosystem, marine mammals, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Marine mammals, arctic marine ecosystem, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Mercury, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Metals, arctic environment, toxic substances, radionuclides, acids, organochlorines, polycyclic aromatic hydrocarbons, 1
Metals, Canadian arctic, chemical contaminants, freshwaters, hydrocarbons, organochlorines, radionuclides, biological implications, 165
Multielement analysis, baseline concentrations, surface soils, Poland, contamination, variance analysis, 279

Neutron activation analysis, phosphorus fertilizer, rare-earth elements, element pollutants in soils and vegetation, X-ray fluorescence analysis, 337
Nutrition, contaminants, diet, Inuit, foods, 247

Organochlorine pesticides, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Organochlorines, arctic environment, toxic substances, metals, radionuclides, acids, polycyclic aromatic hydrocarbons, 1
Organochlorines, arctic, terrestrial ecosystem, contaimination pathways, radioactive fallout, polychlorinated biphenyls, terrestrial food chain, local contamination sources, 135
Organochlorines, Canadian arctic, chemical contaminants, freshwaters, hydrocarbons, metals, radionuclides, biological implications, 165
Oysters, tributyltin, antifouling paints, copper, zinc, 301

Pesticide exposure, biological monitoring, cholinesterase, 315
Phosphorus fertilizer, neutron activation analysis, rare-earth elements, element

pollutants in soils and vegetation, X-ray fluorescence analysis, 337
Poland, baseline concentrations, surface soils, multielement analysis, contamination, variance analysis, 279
Polychlorinated biphenyls, arctic, terrestrial ecosystem, contaimination pathways, radioactive fallout, organochlorines, terrestrial food chain, local contamination sources, 135
Polychlorinated biphenyls, arctic marine ecosystem, marine mammals, marine fish, sea water, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Polychlorinated dioxins, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides. heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated furans, 75
Polychlorinated furans, arctic marine ecosystem, marine mammals, marine fish, sea water, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, 75
Polycyclic aromatic hydrocarbons, arctic environment, toxic substances, metals, radionuclides, acids, organochlorines, 1

Radioactive fallout, arctic, terrestrial ecosystem, contaimination pathways, organochlorines, polychlorinated biphenyls, terrestrial food chain, local contamination sources, 135
Radionuclides, arctic environment, toxic substances, metals, acids, organochlorines, polycyclic aromatic hydrocarbons, 1
Radionuclides, Canadian arctic, chemical contaminants, freshwaters, hydrocarbons, organochlorines, metals, biological implications, 165
Rare-earth elements, neutron activation analysis, phosphorus fertilizer, element pollutants in soils and vegetation, X-ray fluorescence analysis, 337
Rock lobster digestive gland, arsenic lipids, arsenobetaine, HPLC ICP-MS, 321

Sea water, arctic marine ecosystem, marine mammals, marine fish, polychlorinated biphenyls, organochlorine pesticides, heavy metals, mercury, lead, cadmium hydrocarbons, polychlorinated dioxins, polychlorinated furans, 75
Surface soils, baseline concentrations, Poland, multielement analysis, contamination, variance analysis, 279

Terrestrial ecosystem, arctic, contaimination pathways, radioactive fallout, organochlorines, polychlorinated biphenyls, terrestrial food chain, local contamination sources, 135
Terrestrial food chain, arctic, terrestrial ecosystem, contaimination pathways, radioactive fallout, organochlorines, polychlorinated biphenyls, local contamination sources, 135
Toxic substances, arctic environment, metals, radionuclides, acids, organochlorines, polycyclic aromatic hydrocarbons, 1
Tributyltin, oysters, antifouling paints, copper, zinc, 301

Variance analysis, baseline concentrations, surface soils, Poland, multielement analysis, contamination, 279

X-ray fluorescence analysis, neutron activation analysis, phosphorus fertilizer, rare-earth elements, element pollutants in soils and vegetation, 337

Zinc, tributyltin, oysters, antifouling paints, copper, 301
